Never Forget Anyone’s Name

Even If You’ve Known Him As Long As You’ve Lived

First of all, once you finish this revolutionary new memory course, you will never again forget the name or face of anyone important to you. You will be able to greet that person by his full name—instantly—even if you have not seen him again for 3 ... 10 ... even 20 years. That memory is not only endless, but it is mill it more subtle (it is also designed to burn into your memory about that person or you wish) the following night or the following week. The person you mention will remember your name. His position in his company. His most vivid interest. Everyone you mention, and every experience you had with him, is etched into his memory.

One reason repeats this fact again: We realize that such a feat of memory is absolutely imperitive for you today. But we also realize that it is impertinent for you to realize that you are trying to memorize "This Kind of Information in Exactly the Wrong Way. Use the Short Week Method."

Here are a few examples of that performance (the kind you will find in the "Memory-Photographer" device):

1. Memorize a twenty-digit number after staring at it only once.
2. Memorize the names and faces of dozens of people, alive and dead.
3. Memorize a list of twenty appointments, in their exact order.
4. Memorize a deck of cards, without looking at it, in less than one minute.
5. Memorize an entire telephone book, without looking at it, in one sitting.

Now here is our promise: We believe that you will use one of the "Short Weeks" methods to study this information, and that you will prove that you can memorize it. But we guarantee that you will use the "Memory-Photographer" device, because it is the only method of memorization that we know of that can produce the kind of performance you are looking for.
